

MICROBLAING CARY

The process and way of working in our studio is step by step. We expect and allow for extreme fading of the first procedure as much as 60%. This is to ensure proper color matching with your particular skin type. You are required to do your six week touchup with us. Your touchup procedure is considered the second step of your permanent makeup procedure. This Semi-Permanent procedure will ensure you receive the best results and desired color. We work this way to achieve the best and most lasting results.

Please sign to acknowledge the above statement.
